## What's New with Nature's Spirit?

Hello Everyone,

Have you seen the website recently? New products are being published almost every day until we have them all on the website. Stay tuned to be on top with everything going on there. We also want to thank everyone for reading our first newsletter. It became popular rather fast, and we are excited to get the newsletter in front of you every other week.

*We are now on Facebook and Instagram. Follow us on both platforms to see everything going on from day to day.*

Polish Quills is a niche Euro company that has found its place with a very select set of materials. This company is located in Poland next to some of the top trout and grayling rivers in Europe. Because these folks have spent so much of their time on the water and with materials, they have perfected their selection to be the best on the market. These incredible people hand select each feather and hand strip each quill to insure that you have the best quality possible.

Keeping their selection to just a few materials has enabled this company to keep up with their very fine quality. To go with their hand-stripped quill and hand-picked CDC, they also have a Magic Carpet craft fur and an Acrysilk dubbing. Nature's Spirit has the US distribution of these materials, and all of these materials have become very popular in the United States.

### Hand Stripped Quills

These Hand Stripped Quills are a blessing to fly tying. Quill-body fly tying has been around for ages and has become more popular with the surge in Euro-nymph fishing. Nothing looks more natural on any small bug then a quill body. Polish Quills has earned their reputation by the quality of these supple and easy-to-use quills.

Stripping quills can be tricky and frustrating at times, and Polish Quills has it down to a science. Each package comes with 25 quills. They are big enough to tie a size 12, and perfect for

anything down to a size 22. There are 16 colors currently in circulation with 17th being purple which is coming soon. Not only are these hand-stripped quills convenient to tie with, but they are very durable on the fly and in the water as well.

With this quality and color selection available, why strip quills when you can buy the best on the market?

## Magic Carpet

Magic Carpet is a very select craft fur that is provided by Polish Quills. Finding quality and length in craft fur is every streamer tiers biggest problem. Polish Quills put the time and effort into finding the best craft fur on the market. Their Magic Carpet has the length and quality of taper that we as streamer tiers look for.

If you have never tied with craft fur, you should give this material a shot as any bucktail or marabou replacement. You will be happy with the results that you get at your vise and in the water.

This craft fur works with about any size of streamer from steelhead flies to small bone-fish flies. Hand-stacking this easy-to-use material will make a uniform, short, bulky tail. You can also leave it long for larger streamers.

With 18 different colors to pick from, you can fill about any streamer box you posses.

Polish Quills hand-selects each feather for the best quality, counts 100 feathers, and **stacks** them in the package. Along with their quality, you have 19 colors to pick from, giving you exactly what you need for a wide range of bug patterns.

## Cul De Canard

Cul De Canard is one of the top feathers in the bug world, being a favored feather among midge and emerger tiers. Googling "CDC flies" will give you access to a massive selection of patterns to pick from.

Unlike all other packages of CDC, Polish Quills

## Acrysilk Dubbing

Acrysilk dubbing is a top-quality dubbing made from a soft acrylic fiber and true silk. This short-fibered dubbing is a tier's dream for mid-sized and smaller bugs. It also floats well, making it a great dubbing for dry flies.

The short fibers of Polish Quill's Acrysilk Dubbing makes a natural looking body and collar when used in a dubbing loop. You can brush it out and not have overly-long fibers coming off the fly that need to be trimmed. This feature makes this a great dubbing for scuds.

\*\*\*\*\*

Polish Quills has made a name for themselves in quality and hand selection. If you have not tied with any of their products, we urge you to do so and make your own judgment. We are happy to have them in our lineup of products, and are excited to see any future product that comes from Polish Quills.
